

Bhaskar

Java Developer

✉ baskarram1498@gmail.com ☎ 8667029861 📍 Chennai 📅 Jan 14, 1998

CAREER OBJECTIVE

Java Backend Developer experienced in designing and developing scalable backend applications using Java, Spring Boot, Spring Cloud, Microservices, and REST APIs. Skilled in building distributed systems and cloud-native applications with hands-on expertise in Docker, Kubernetes, CI/CD pipelines, and Google Cloud Platform (GCP) services including GKE, Cloud Run, and Pub/Sub. Strong focus on developing secure, high-performance, and reliable enterprise applications.

PROFESSIONAL EXPERIENCE

Experienced Software Developer with 7 years of experience in the IT industry, including 5 years of experience in Java, Spring Boot, Microservices, and REST API development.

Experienced System Engineer with 5.5+ years of experience at Tata Consultancy Services.

Experienced Software Developer 1.5+ years of experience at Grid Dynamics.

Successfully completed projects including USAA Property Rules Mining, CORE 5 - WhiteOps, Auto MNP Team, and Pricing Data/Pricing Calculation solutions & VISA Payment Processing and Reporting systems, with hands-on experience in backend development, API integration, cloud-native applications, and Agile methodologies.

Work Experience

SOFTWARE DEVELOPER:, GRID DYNAMICS:

Jan 2025 – Jul 2026 | Chennai

GENUINE PARTS COMPANY(Jan 2025 - Dec 2025):

- Developed and maintained **Java-based backend SDKs** for pricing data processing, calculation, and access modification using **Java, Spring Boot, and Microservices architecture**.
- Designed and implemented reusable **REST APIs and backend services** to standardize pricing logic across multiple applications and services.
- Integrated with **TAMS (inbuilt pricing engine)** to automate discount calculation workflows, improving pricing accuracy and reducing manual processing.
- Contributed to multiple repositories including **Pricing Data SDK, Pricing Calculation SDK, Pricing Access Modification SDK, Pricing Files, and Archival Jobs**, ensuring modular and maintainable application design.
- Developed and executed **end-to-end integration testing** using **Karate framework** and implemented test SDKs to validate functionality, reliability, and performance.
- Worked with **Google Cloud Platform (GCP)** services including **BigQuery** for large-scale data analysis and validation of pricing datasets.
- Integrated backend services with **Apache Kafka** to publish and consume pricing-related events, supporting **asynchronous communication** and real-time data processing across microservices.
- Utilized **Cloud Run** and **Kubernetes** for application deployment, orchestration, and monitoring, supporting cloud-native application delivery and scalable containerized deployments.
- Improved backend workflows by optimizing pricing processes, enhancing application performance, and reducing processing latency.
- Collaborated with cross-functional teams to analyze requirements, implement solutions, and deliver high-quality backend features.
- Followed **Agile methodologies**, including sprint planning, backlog grooming, and retrospectives.

VISA (Feb 2026 - July 2026):

- Worked on **payment processing and reporting systems**, analyzing transaction data and backend workflows to identify discrepancies and system issues.
- Performed **root cause analysis (RCA)** on application issues, investigated defects, and collaborated with backend teams to implement effective solutions.
- Analyzed business requirements and supported troubleshooting of **backend services and payment-related workflows**.
- Managed and tracked defects using **Jira**, providing detailed technical analysis and issue resolution updates.
- Validated bug fixes and performed functional testing to ensure application reliability and improve system quality.
- Worked with cross-functional teams including development, QA, and business teams to support production issue resolution.
- Completed training in **React** and contributed to frontend development by building and enhancing reusable UI components.
- Followed **Agile development practices** including defect triaging, sprint activities, and continuous improvement processes.

DEVELOPER, TATA CONSULTANCY SERVICES

Jul 2019 – Dec 2024 | Chennai

USAA PROPERTY RULES MINING (July 2019 - June 2020):

- Analyzed and documented **legacy application workflows and call flows for Property & Casualty (P&C) insurance** transactions across multiple Lines of Business (LOBs).
- Performed detailed **business rule analysis** by reviewing legacy codebase and extracting functional requirements to support application maintenance and enhancements.
- Prepared **technical specification documents** and maintained detailed documentation for business processes, system flows, and application functionality.
- Validated extracted business rules by executing transactions and verifying system behavior against expected business outcomes.
- Created and maintained **business rule documentation, UI specifications, and process documentation** with relevant screenshots and technical details.
- Conducted **peer reviews** to ensure accuracy, consistency, and quality of technical documentation.
- Participated in **Agile ceremonies**, sprint discussions, and daily status meetings to support project delivery.

CORE 5 - WHITEOPS (June 2020 - Dec 2020):

- Evaluated and analyzed software tools for **testing, defect tracking, and quality management**, providing recommendations based on project requirements.
- Designed and prepared comprehensive **test plans, test scenarios, test cases, and test procedures** to ensure effective application validation.
- Analyzed business requirements and supported troubleshooting of **backend services** and workflows.
- Collaborated with development and QA teams for **defect identification, tracking, and resolution**.

AUTO MNP TEAM (Dec 2020 - May 2022):

- Monitored renewal members and resolved any failures by sending the fixes to the onshore team.
- Successfully troubleshooted and resolved download failure of renewal members from production environment and implemented fixes in the test environment.
- Collaborated with onshore team by providing timely updates and fixes for the resolved issue.

PNC BANK (May 2022 - Dec 2024):

- Developed and implemented **RESTful APIs** using **Java, Spring Boot, and Microservices architecture** for Credit Card Modernization applications.
- Designed and developed scalable **backend services** with focus on **performance, reliability, and maintainability**.
- Integrated with **databases** to retrieve, process, and manage customer offer details efficiently.
- Integrated **external APIs** for seamless data exchange between applications and backend services.

- Worked on **Microservices-based application development, API integration, and backend service enhancements.**
- Managed source code using **Git** for version control and collaborative development.
- Implemented **JUnit unit testing** to ensure application quality and improve code coverage.
- Followed **Agile development practices**, coding standards, and best practices for enterprise application development.
- Containerized applications using **Docker**, deployed and managed services on **Kubernetes**, and supported **CI/CD pipeline** automation through **Jenkins** for efficient build, testing, and deployment processes.

Skills

Java 11+	Spring Boot
RESTful API Development	MySQL
Jenkins	Docker / Containerization
Google Cloud Platform (GCP)	CI/CD Pipelines
Pub/Sub	Spring Security
Spring Cloud	Kubernetes
Microservices Architecture	Core Java Programming
Agile Development	Kafka

Education

B.E- E.E.E , <i>K. Ramakrishnan College of Technology</i>	2015 – 2019 Trichy, Tamil Nadu
Higher Secondary , <i>E.R. Higher Secondary School</i>	2013 – 2015 Trichy, Tamil Nadu

Certificates

GOOGLE CLOUD CERTIFICATION (ASSOCIATE CLOUD ENGINEER)

REACT

RESPONSIVE WEB DESIGN

JAVASCRIPT ALGORITHMS AND DATA STRUCTURES

GUIDEWIRE SPECIALIST CERTIFICATION

ILP TRAINING (JAVA)

AGILE METHODOLOGY

**CAMBRIDGE ENGLISH ENTRY LEVEL CERTIFICATE | CAMBRIDGE UNIVERSITY ACHIEVED LEVEL:
COUNCIL OF EUROPE LEVEL B1 BEC OVERALL SCORE : 146**
