

GINNY KUMAR

****Sr. QA Specialist | QA Automation ****

Phone: 9646344140 | **Email:** kumarginny41@gmail.com | **Location:** Mohali, India

LinkedIn: [linkedin.com/in/ginny-kumar](https://www.linkedin.com/in/ginny-kumar)

PROFESSIONAL SUMMARY

Sr. QA Specialist with 11+ years of experience in Manual and Automation Testing across **FinTech, E-commerce, and Education** domains. Strong expertise in **Selenium WebDriver, Playwright, Java, JavaScript, API Testing, SQL, Jenkins CI/CD, Agile, and Scrum**, with hands-on experience in testing **AI-powered applications**.

Experienced in **designing and maintaining automation frameworks, developing regression suites, API and database validation, integration testing, and end-to-end testing**. Hands-on experience testing **banking, payment, and accounting integrations**, including **Plaid**, across core banking and payment applications. Proven track record of reducing manual regression effort, improving release quality, mentoring QA engineers, and driving testing activities across the software development lifecycle.

CORE TECHNICAL SKILLS

Automation Testing: Selenium WebDriver, Java, Playwright, JavaScript, Automation Framework Development, Regression Automation

API & Backend Testing: REST API Testing, Postman, API Validation, Integration Testing

Database Testing: SQL, Database Validation, Backend Data Verification

AI Testing: AI-powered Application Testing, AI Data Extraction & Validation, Vector Database Testing

FinTech & Integrations: Banking Integrations, Payment Applications, Accounting Integrations, Plaid, Core Banking Applications

CI/CD & Tools: Jenkins, CI/CD, Jira, Git

Testing: Functional Testing, Regression Testing, Integration Testing, End-to-End Testing, Smoke Testing, Sanity Testing, Manual Testing

Methodologies: Agile, Scrum, Test Strategy, Defect Management, Release Validation

Leadership: QA Mentoring, Test Planning, Effort Estimation, Requirement Analysis, Client Communication

PROFESSIONAL EXPERIENCE

Sr. QA Specialist | ForwardAI

May 2021 – Present

- Lead QA activities for **FinTech web applications**, including test planning, test strategy, execution, defect management, and release validation, contributing to a **30% reduction in post-release defects**.
- Design, develop, and maintain automated regression test suites using **Selenium with Java and Playwright with JavaScript**, reducing manual regression effort by **40%**.
- Design and maintain reusable automation components to support scalable and maintainable test automation across critical application workflows.
- Lead **functional, regression, integration, API, database, and end-to-end testing** for critical FinTech application features.
- Test and validate **banking, payment, and accounting integrations**, including **Plaid**, across core banking and payment workflows.
- Perform backend and database validation using **SQL** to verify data integrity and ensure consistency between application and backend systems.
- Lead testing of **AI-powered application features**, including data extraction and validation across multiple core application workflows.
- Perform testing and validation of **Vector Database-related functionality** supporting AI-powered application workflows.
- Integrate automated test suites with **Jenkins CI/CD pipelines** to support continuous testing and faster feedback during deployments.

- Analyze defects, perform root-cause investigation, and collaborate with development and product teams to drive timely resolution.
- Mentor **4 junior QA engineers** on automation best practices, testing techniques, and framework usage, helping improve team testing velocity and reduce project blockers.
- Collaborate with cross-functional teams to understand requirements, identify testing risks, and ensure adequate test coverage for new features.

Executive Quality Control (QA) | Ablysoft Pvt. Ltd.

Oct 2019 – May 2021

- Managed end-to-end QA activities for client-facing **web and mobile applications across Android and iOS**.
- Planned and executed functional, regression, integration, and end-to-end testing across multiple concurrent projects.
- Conducted **REST API testing using Postman** and validated backend data through **SQL/database testing**.
- Performed backend validation to verify data integrity and consistency across application workflows.
- Managed testing activities across multiple projects, including **effort estimation, test planning, execution, defect tracking, and release validation**.
- Mentored **3 junior QA team members**, reviewed test deliverables, and supported adherence to QA standards and release timelines.
- Participated in requirement discussions with clients and development teams to clarify specifications and identify potential quality risks.
- Provided QA release sign-off based on test results, defect status, and overall product readiness.
- Collaborated with development and business teams to investigate defects and ensure timely resolution before production releases.

Test Engineer | Watermark Insights

Nov 2014 – Aug 2019

- Created and executed comprehensive **manual test cases** covering functional, regression, integration, and end-to-end application scenarios.
- Analyzed business and functional requirements to identify test scenarios, dependencies, and potential application risks.
- Maintained and enhanced existing **automation scripts** to support evolving business requirements and application functionality.
- Executed regression testing to identify defects and ensure existing functionality remained stable after application changes.
- Participated in client discussions to gather requirements, clarify specifications, and resolve functional and technical queries.
- Collaborated with developers and business stakeholders throughout the software development lifecycle to investigate and resolve defects.
- Supported release validation by executing planned test scenarios and communicating application quality and defect status to stakeholders.

EDUCATION

Master of Computer Science

Gurunanak Khalsa College, YNR | 2010 – 2012

70%

Bachelor of Computer Science

Gurunanak Girls College, YNR | 2007 – 2010

60%

DOMAIN EXPERIENCE

FinTech: Core Banking, Payment Applications, Banking Integrations, Accounting Integrations, Plaid

AI Applications: AI-powered Data Extraction, Data Validation, Vector Database Testing

E-commerce: Web and Mobile Applications Testing

Education: Web Application Testing
